EXPERIENCE

Web Designer

Jul 2016 - Present

PackYourBack (volunteer)

- Providing website design services for PackYourBack using web stack technologies
- Improving PackYourBack's web presence, increasing online donations by 47%
- Overseeing implementation of design and technical updates for packyourback.org
- Managing a web development team of three, coaching their continual learning

Software Developer

Feb 2016 – May 2017

ChargeOver

- Built requested features with PHP, SQL, HTML, CSS, and JavaScript/jQuery
- Was responsible for designing and implementing over 75 improvements
- Trained to provide tech support for clients, and product demonstrations for leads
- Adapted to learn new technologies as business needs arose

Junior Systems Administrator

Sep 2014 – Mar 2016

Central Michigan University - Technology Operations

- Provided specialized help desk services for over 100 CMU auxiliary staff
- Configured batches of Apple products via Puppet configuration management
- Programmed scripts in Ruby, Python, and Bash to automate routine tasks
- Administrated and maintained ~50 printers through the CUPS printing server

PROJECTS

EZ-Biz Management Application (Spring 2016, 3-person project):

- "Generic-use" application designed for defining and storing custom business data
- UI templating system implemented in Python using the Django web framework

Pachelbel's Canon Arduino Trio (March 2015, 2-person project):

- Transposed Pachelbel's Canon for string trio into its hertz representations
- Implemented code on the Arduino prototyping platform in C
- Created a syncing function to solve gradual misalignment within the trio parts
