Utrecht, the Netherlands

Software engineer with 9+ years of experience building reliable systems for teams from early-stage startups to global enterprises

Work Experience

Senior Developer, GoMeddo – Amsterdam, the Netherlands

Oct 2023 – Present

- Developing enhancements within Salesforce and Amazon Web Services via Python, React, Apex, and Lightning Web Components.
- Building and maintaining features within the suite of GoMeddo products.
- Working within a cross-functional team to identify requirements, and to architect and construct scalable solutions.

Senior Salesforce Developer, Valtech – Utrecht, the Netherlands

Apr 2022 – Sep 2023

- Consultation, analysis, implementation services to expand clients' capabilities within Salesforce and their surrounding integrations.
- Created test-driven and scalable solutions through HTML, CSS, JavaScript, Apex, and SOQL.
- Designed and implemented internal software processes to improve company access to Salesforce data through Slack.
- Mentored junior developers on how to contribute to the software development cycle.

Senior Salesforce Developer, Ping Identity Corporation – Denver, CO

May 2019 – Apr 2022

- Lead conversion of internal Salesforce org to Git, decreasing risk of mistakes during change management.
- Refactored Apex test suite to mock-based model, decreasing average suite runtime speed by up to 75%.
- Converted frontend development process to test-driven development for Lightning Web Components through the Jest framework.
- Built Selenium and JavaScript-based click-through flows in New Relic to improve visibility on Experience Cloud availability metrics.
- Oversaw adoption of CI/CD implementation, reducing department-wide time spent on deployments by up to 40 hours per sprint.
- Mentored junior developers and admins on fundamentals of Salesforce, deployment processes, and version control.
- Built, tested, and deployed Salesforce features across multiple environments utilizing HTML, CSS, JavaScript, Apex, and SOQL.
- Developed integrations with pingidentity.com, and enhancements to Ping's Support and Partner Experience Cloud instances.
- Implemented Coveo extensions to integrate intelligent search into Ping's Support environment.

Software Engineer, aMind Solutions – Denver, CO

2018 – 2019

- Consulted with clients and built Quote to Cash solutions in Salesforce CPQ and Billing.
- Built Apex and Aura enhancements to accelerate firm deliverability of CPQ solutions.

Developer, Bluewolf, an IBM Company – Denver, CO

2017 – 2018

- Designed, built, and maintained Salesforce solutions with Aura, Apex, Visualforce, and SOQL.
- Set up and lead client meetings to demo solutions, share status updates, and offer feedback surrounding implementation progress.
