EXPERIENCE

Valtech / Appolutely – Senior Salesforce Developer

Apr 2022 – Present

Utrecht, The Netherlands

- Providing consultation, analysis, and implementation services to expand clients' business capabilities within Salesforce and their surrounding integrations.
- Designing and implementing internal software processes to improve company access to Salesforce data through Slack.
- Creating test-driven and scalable solutions through HTML/CSS, JavaScript, Apex, and SOQL.
- Mentoring junior developers on how to contribute to the software development cycle.

Ping Identity Corporation – Senior Salesforce Developer

Mar 2021 – Apr 2022

Denver, CO

- Lead conversion of Salesforce org to a version control-based source of truth model (Git) to eliminate all possibility of overwriting changes.
- Refactored Apex unit test suite to a mock-based model, decreasing average suite runtime speed by up to 75%.
- Converted Ping's frontend implementation process to a test-driven development model for Lightning Web Components through the Jest framework.
- Simulated clickthrough processes in New Relic via JavaScript/Selenium to build metrics for SFDC community availability, and to improve team response speed.
- Oversaw adoption of Salesforce team's CICD implementation, reducing department-wide time spent on deployments by up to 40 hours per sprint.
- Mentored junior developers and admins on fundamentals of Salesforce.

Ping Identity Corporation – Salesforce Developer

May 2019 – Mar 2021

Denver, CO

- Built, tested, and deployed Salesforce full stack features across multiple environments in HTML/CSS, JavaScript (LWC, Aura), Apex, and SOQL.
- Developed integrations with www.pingidentity.com, and enhancements to the Support and Partner Communities.
- Implemented Coveo extensions to integrate intelligent search into the Support community.
- Oversaw and trained admins and developers on use of Git and CICD pipelines.

aMind Solutions – Software Engineer

Aug 2018 – May 2019

Denver, CO

- Consulted with clients and built B2B solutions in Salesforce CPQ and Billing.
- Provided guidance as a Salesforce subject matter expert to the VP of Customer Solutions surrounding solutioning and market strategies for Salesforce CPQ.
- Built Apex and Aura enhancements to accelerate firm deliverability of CPQ solutions.

Bluewolf, an IBM company – Developer

Oct 2017 – Aug 2018

Denver, CO

- Designed, built, and maintained Salesforce solutions with Aura, Apex, Visualforce, and SOQL.
- Identified bugs and built solutions for multiple clients simultaneously.
- Set up and lead client meetings to demo solutions, share status updates, and offer technical guidance surrounding building progress.

ChargeOver – Software Developer

Mar 2016 – May 2017

Mount Pleasant, MI

- Implemented over 75 internal features in HTML/CSS, JavaScript, PHP, and SQL surrounding implementation of payment gateways and recurring billing services.

EDUCATION

Central Michigan University – B.A.A., Computer Science & Entrepreneurship

August 2012 – May 2017

Mount Pleasant, MI
